

Geomar C-138 DB-D | Air Fog Horn

Product Description

Geomar C-138 DB-D is an air horn ruggedly constructed to withstand the most severe sea environment using the best seawater, non-corrosive materials. It has a heating thermostatically controlled for navigation in polar areas and 2 electro valves for normal and emergency operation.

Application

Suitable for vessels with lengths between 75 and 200 meters

Design Features

Frequency and sound intensity:	According to IMO 1972 regulations
Audible range:	1,5 miles
Frequency:	160 cps
Operation:	Console push button and manual pull Wing push buttons optional
Best seawater, non-corrosive materials:	Brass and stainless steel
Air horn:	With working pressure between 7 and 40 Kg / cm ²
Air consumption:	30 l/sec
Diaphragm diameter:	125 mm
Hose diameter:	16 mm
Double electro valve:	Main and emergency
Heating:	24V, 220V. 200W
Voltage:	24V, 220V
Weight:	38 kg
Signal controller:	Audiotronic I / II (optional)

Certificates

Type approved by Det Norske Veritas (DNV)
